

## OT Approved Products

### Related Documents

The following related sections of the OT standards shall also be applicable to this section.

OT Engineer shall approve all product cut sheets prior to purchasing and installation by contractor. Reference S9 Approved Products.

***The Approved Products List*** has been established to assist the DCI with MAA preapproved Products. These products have a proven performance at the MAA based on established product performance, appearance, installation means and methods and with input from installers and system maintenance providers.

All named products are based on the above criteria; approved equals will be considered and evaluated by the Office of Technology.

Web links have been provided for cut sheets and specification reference when available.

Products incidental to the project are on this Approved Products list. This list is for major components and assemblies. Incidental products shall follow industry standards and best business practices established by the MAA, MAA design and Industry standards dictate where applicable.

Contact the Office of Technology, Telecommunications division for availability of attic stock. Attic stock may be allocated for projects to assist with special circumstances.

Use of attic stock is at the sole discretion of the Manager of Telecommunications or designee.
